Hospital

Medical Staff Services

Overview:

The distributor called on the Director of Medical Staff services to discuss their space and filing requirements. The hospital had top tab folders filed in 19-4 drawer file cabinets. The cabinets were scattered about the department wherever they would fit, using 200 square feet of floor space. The competition was Tab products.

Solution:

The director wanted a label print software solution to provide for unlimited users. NetLabels provides unlimited user access, so our distributor was in the drivers seat. The conversion team converted approximately 2,600 files using NetLabels. (a combination of 1-3/4" and 3-1/2" expansion pockets) The conversion included the installation of three 9' Spacesaver Mobile carriages, labeling of new expansion pockets and the transfer of file contents to the new pockets. Floor space usage was consolidated to 81 square feet.

Re-order Potential:

The client creates approximately 10 new files per week, and they love the new system. The department is a very active area in the hospital, every doctor in this network has his/her credential file in this department. Our distributor expects this will lead to new business with many of the physicians in their private practices, as well as other departments in the hospital.

The label style used was #2334. You can view or print a sample of this label by going to www.netlabels.com. Now, click on the "print labels" box. Enter "guest" under username and password. Lastly, just scroll down the label styles until style #2334 appears and click on it.
